1. Claims 4-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 4, line 9, "recovering the file from another node" is vague and indefinite. It is not clear how the file is recovered from another node.

As per claims 5-11, these claims are rejected because they dependent upon the rejected base claim.

As per claim 12, lines 17-20, "a replicator service...to manage the process of recovering the file from another node" it is unclear how the replicator manage the process of recovering the file from another node.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 4 is rejected under 35 U.S.C. 102(e) as being anticipated by Gerbault et al (6,324,661).

Gerbault et al disclose a method for managing integrity faults, comprising:

Performing a content checksum of a file in a first repository node to obtain a first checksum and storing the first checksum in the first repository node (col. 4, lines 13-21);

Re-performing the content checksum on the file to obtain a second checksum (col. 4, lines 25-27) and comparing the second checksum with the first checksum (col. 4, lines 27-29); and

If the second checksum does not equal the first checksum, then recovering the file from another node (abstract, col. 4, lines 43-47).

4. Claims 1-3 are allowable.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Friday.
